## Food Industry Lean Webinar Series

# Are you ready to design and scale-up a new value-added food product and eliminate non-value-added processes?

Impact Washington will provide a four-part introductory Lean Webinar Series designed for small food manufacturing businesses looking to develop a Lean culture and grow their businesses.

*We recommend attending Module 1 prior to other modules but welcome you whenever you can join.*

| Module 1 Feb 7, 2023 8:00AM-12:00PM | Module 2 Feb 9, 2023 8:00AM-12:00PM | Module 3 Feb 14, 2023 8:00AM-12:00PM | Module 4 Feb 16, 2023 8:00AM-12:00PM |
|---|---|---|---|
| **Intro to Lean Food Industry Manufacturing** | **Lean Value Stream Mapping** | **Problem Solving with Facts and Data** | **Rapid Improvement Workshops (Kaizens)** |
| Education in the Principles of Lean Food Industry Manufacturing and become familiar with the Lean Manufacturing principles, definitions, through presentation and discussion exercises that demonstratethe Lean concepts learned. | Guidance in the development, planning and execution of Value Stream Mapping. The purpose is to identify target areas for improvement efforts and develop the strategic areas for Lean Implementation. | Learn how to successfully collect and analyze facts and data to solve any type of problems. This webinar will introduce you to a simple, yet structured method to understand the root causes of problems; collect data to verify the problem, develop and select effective solutions, and track the results of the solutions implanted. | Training, implementation, and transformation of a selected area. Each Kaizen will use a cross-functional team for optimum performance working in the selected area, and other areas that might be impacted by implemented changes. |
